

Thermocouple Attachment Pads

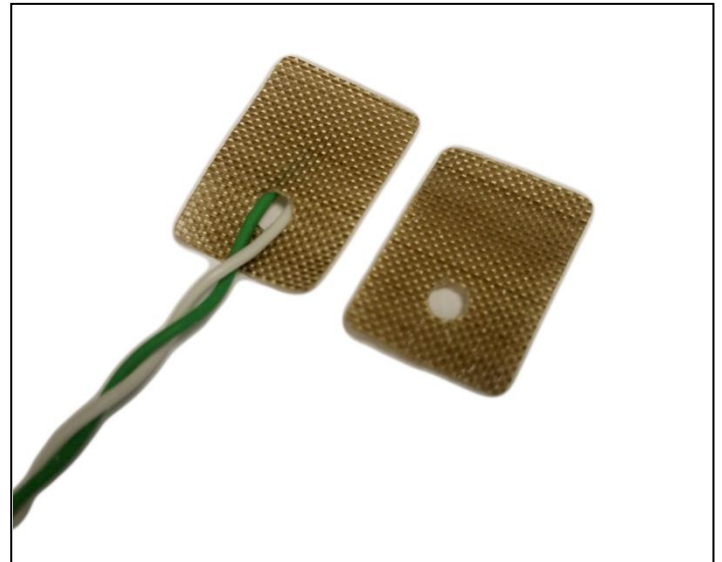

Made in the UK 

Description

Our Self-adhesive thermocouple attachment pads are ideal for fixing sensors to many surfaces and structures.

Thermocouple attachment pads are designed to be used with exposed junction thermocouples. They are supplied at a standard size of 26mm x 12mm PTFE Glass cloth, lined with silicone pressure sensitive adhesive rated -50 to 250°C which provides a way of easily measuring surface temperatures with simple wire thermocouples.

They are ideal for many surface mount applications such as pipes, hot plates & oven doors due to the Silicone pressure sensitive adhesive.

Features

- Packs of 20 or 100
- Silicone Pressure Sensitive Adhesive
- Designed for attaching small diameter thermocouples to surfaces
- Rated -50 to 250°C

Application

- Oven Doors
- Hotplates
- Pipes

Specification

Product	Thermocouple Attachment Pads
Temp Range	-50 to +250°C
Pack Size	20/100 Pads
Insulation Class	180°C
Material	PTFE Glass cloth
Adhesive	Silicone Pressure Sensitive Adhesive
Dimensions	26mm x 12mm
Part Number	PAD-100
