

# Velcro Thermocouple

Made in the UK 

## Description

Thermocouple with wrap around Velcro™ strap designed to measure the surface temperature of pipes.

This temperature sensor consists of a thermocouple, available in type K, J or T mounted on a double sided Velcro™ strip. It is ideal for the measurement of pipe temperatures up to 100°C with diameters up to 100mm. The sensor may be wrapped around the pipe and with the Velcro™ securing it in place to ensure good thermal contact between pipe and thermocouple tip. It can easily be removed and replaced for temporary or more permanent applications. The sensor has a 1 metre PVC lead wire and mini plug for use with hand held digital indicators.

## Specification

Product	Velcro Thermocouple
Type	K, J or T
Temp Range	0 – 100°C
Lead length	1 metre
Velcro length	500mm
Lead Material	PVC 7/0.2mm
Termination	Mini plug as standard
Part Number	TSVEL

## Features

- Type K, J or T thermocouple
- 0 – 100°C temperature range
- Easily removed and replaced
- For pipe diameters up to 100mm
- 1 metre PVC lead

## Application

- HVAC
- Flow and return temperature set up
- Pipes and frames

## British Made

All of our sensors are designed, manufactured and assembled in the UK
